SelectScience & Merit Brief

The Scientists' Channel®

SelectScience & Merit Partnership Brief

BACKGROUND

SelectScience are looking to reimagine their digital experience to drive growth.

Based on a successful digital transformation and technology alignment in the last two years, the next phase evolution is to improve, enhance and enrich their current experience to benefit both scientists and clients.

PARTNERSHIP OPPORTUNITY

We are looking for an AI, data and tech partner to help us with various deliverables within the programme.

CURRENT TEAM & PARTNERS

SelectScience Team

- Editorial, Sales, Marketing, Technology

mmStudio & Consultancy

- Digital Strategy, Audience Development & SEO

GOALS

Improve the digital experience using emerging AI and Data technologies that create unique best in class digital experience and data pipelines for the business.

These experiences support the scientists buying journey for the latest equipment and instruments as well strong editorial opinion for the sector.

FOCUS

As per our discussion, the brief specifically looks at support in the following categories

- Content Automation
- Search & Discovery
- Citations
- New customer centric features

EXPECTED OUTCOMES

We aim to meet our scientists where they are and on what platforms best serves them best.

Measurement will be based on

- Audience growth = Traffic Increase
- New member/subscriber sign-ups
- Optimised Sales Generation Funnel (SQL, MQL)
- Increase Webinar sign-ups
- Increase % of Client Partnerships

The specifics of these outcomes will be agreed with partners in the planning phase.

GUESTIMATE REQUEST

We recognise this is not a detailed project brief. We are building the investment case to drive growth, therefore we need to understand costs, LOE and timing of our new ideas to ensure investment reflects cost & impact.

Request for response

We seek the following for each workstreams

1. Guestimate
2. Approach to prioritisation
3. How would Merit partner within a gated performance based programme?
4. Topline timeline, phasing, roadmap
5. Share Data and Ethical Scrapping Policy

RESPONSE TIMINGS

We would like a response by **Weds Dec 10th** to assist with a team offsite and 2026 Planning..

GOVERNANCE & COMMUNICATION

- Project Management Structure
- Communication Protocols
- Reporting and Review Cadence

IMPLEMENTATION PLAN

- What information & access would Merit need for each workstream
- Onboarding and Setup
- Integration Testing and Validation
- Go-Live and Transition Plan

DATA SECURITY & COMPLIANCE

- Understand approach to, security, compliance, and Privacy Standards
- Regulatory Requirements (GDPR, ISO, etc.)
- Access Control and Authentication
- Data Retention and Deletion Policies

SERVICE LEVELS & SUPPORT

- SLAs and KPIs
- Issue Resolution and Escalation
- Ongoing Maintenance and Updates

PRICING & COMMERCIAL TERMS

- Cost Structure and Payment Terms
- Change Request Process
- Renewal and Termination Clauses

RISKS & MITIGATION

- Identified Risks
- Mitigation Strategies
- Contingency Planning

Product Overview

PRODUCT PRIORITISATION

Our Product Programme focuses on a test and learn approach tied to performance goals.

This allows all teams and partners to focus on the highest impact work to deliver both audience and commercial goals.

We aim for a mix of focused deliverables and best practice implementation (ie. SEO) with innovations to create new experiences and leapfrog our competitors.

The SelectScience Programme will have a mix of partners so it is critical that we are all aligned to the same goals, prioritisation and performance goals.

MERIT PARTNERSHIP

Ambition is that Merit are partnering with SelectScience from the Differentiate Phase with Release in Transformation. While work may start in advance of February, the impact will be expected within the Transform Phase.

Nov - Jan

OPTIMISE

- Template Optimisations
- Apply best practices improvements to existing site
- Targets include return to baseline performance - Audience & Traffic pre-migration

Feb - Apr

DIFFERENTIATE

- User Journey Optimisations
- Improved Registration - Dynamic Gating
- Content Automation*
- AI Data Strategy*

May onwards

TRANSFORM

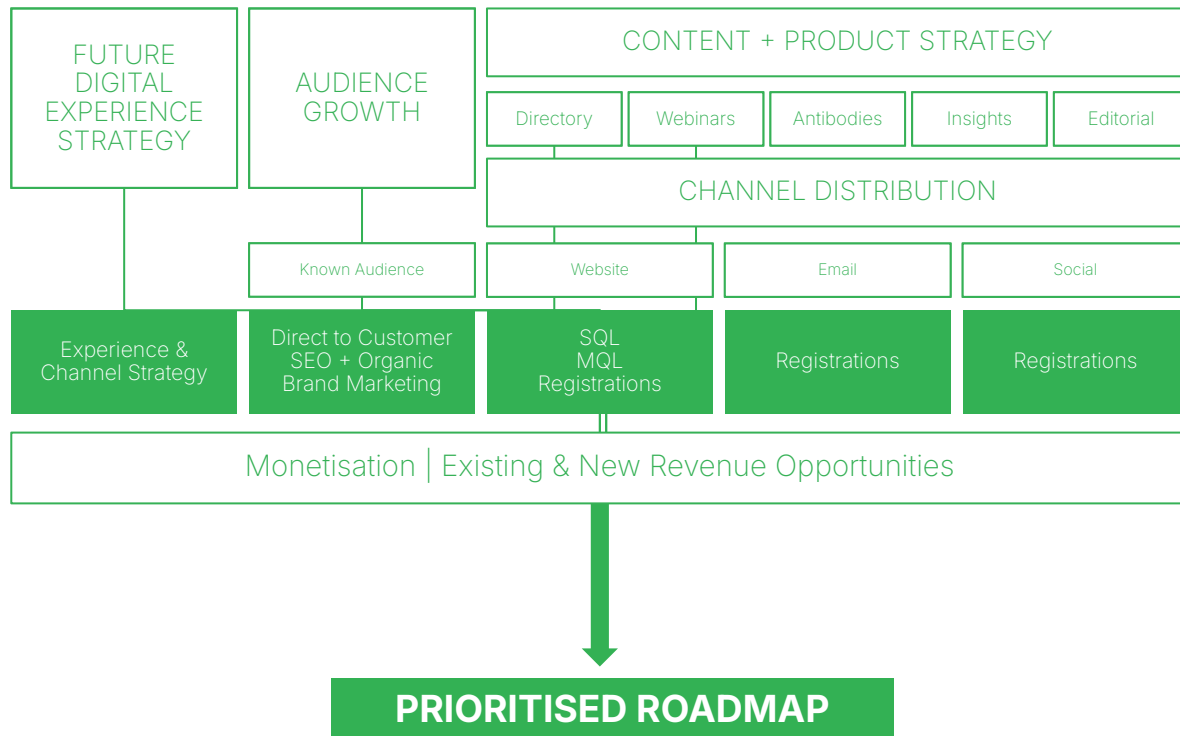

- Search & Discovery*
- Citations*
- Digital Experience*

Digital Product Workstreams

END TO END DIGITAL EXPERIENCE

While the focus of this brief is specifically on the website, we are sharing the overall framework for the strategic programme.

We will keep the brief focused to the website, but we believe visibility of the overall plan in particular how we think about the sales funnel will help us design a digital experience that meets the needs of scientists and clients.

Technology Stack & Architecture

DEPENDENCIES & ASSUMPTIONS

- SelectScience will maintain its existing Technology Stack

PRODUCT & EXPERIENCE

- Figma - UX Tools
- Front End Framework > Vercel
- Content Delivery - CDN
- Personalisation - TBC

APPLICATION LAYER

- CMS > Sanity
- CRM > HubSpot
- Access & Entitlement > Zephyr
- Content Gating > Zephyr

INTEGRATIONS & APIS

- Information on integration with third party platforms
- API Gateways, webhooks, custom services

DATA REFRESH RATE

- Refresh rate has not yet been decided but would be daily as a starting point

DATA LAYER

- Sources, Pipelines, DataLake, Integration Middleware, Analytics Tooling
- SelectScience Priority Content
- 3rd Citations
- Metadata

INFRASTRUCTURE & HOSTING

Cloud providers, compute, storage, networking, containerisation, security baselines.

MARKETING & COMMERCIAL

MarTech stack, email automation, ad platforms, attribution, CRO, lead scoring, sales enablement, account intelligence.

PERFORMANCE MANAGEMENT

- Reporting and Analytics

COLLABORATION & PRODUCTIVITY

Messaging, project management, documentation, QA, design tools, version control.

GOVERNANCES, SECURITY & COMPLIANCE

IAM, SSO, monitoring, logging, vulnerability management, policy enforcement, consent management.

OBSERVABILITY & RELIABILITY

Monitoring, alerting, APM, logging pipelines, incident management, SLAs/SLOs.

Where we think Merit can help?

SCOPE SUMMARY

This is a plan on a page.

In the following sections we will explain each section in more detail with examples.

The proposal needs to address how Merit may help SelectScience implement these concepts and product concepts, features and capabilities.

However, we recognise that you may also spot opportunities to explore. Please list any of these also.

DIGITAL EXPERIENCE

Creating new experiences, components and features that enrich the digital experience. For example and not exhaustive

- Q&A components compiling all content to create AI driven Q&A
- AI Summary Descriptions
- Conversational Chatbots

CONTENT + AUTOMATION

Within the existing workflow we can explore the following

- Reducing manual effort in sourcing, enriching and classifying content that support audience (SEO goals)
- We have built an AI + SEO tool that allows editors to enhance content at individual URL level but this needs to be bulk conversion site or category wide.

SEARCH & DISCOVERY

Move from a keyword based search to natural language search using semantic integrations and other methods.

CITATIONS

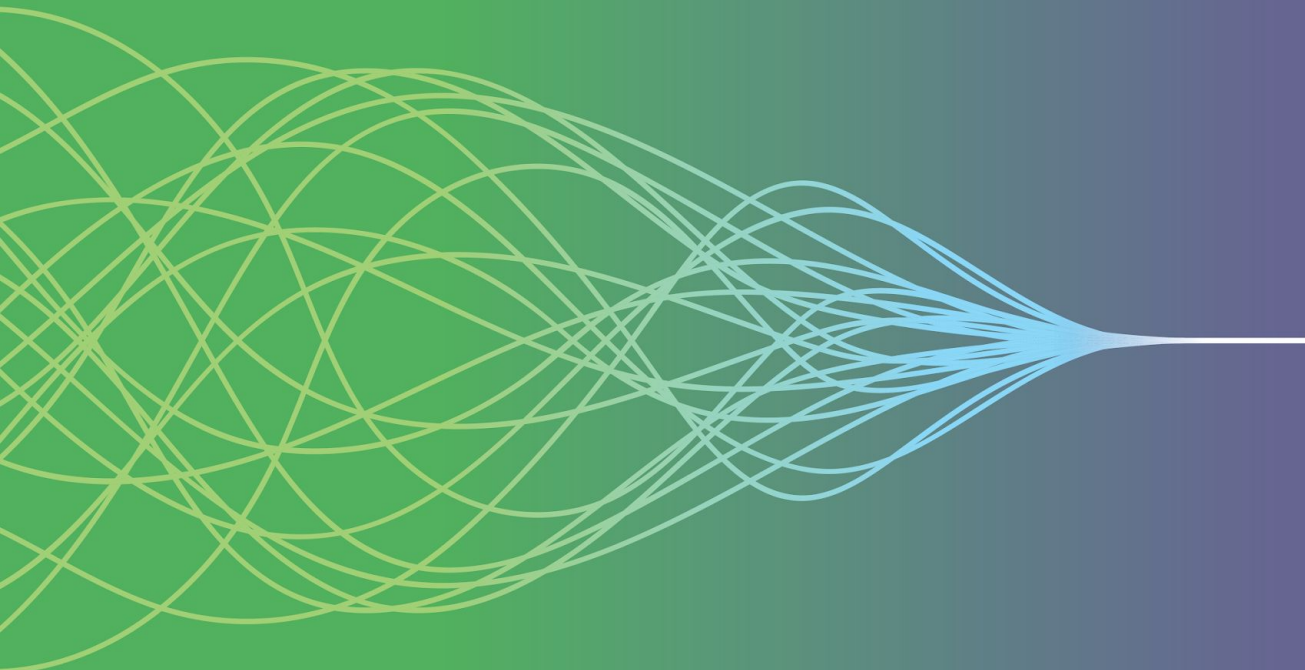

When scientists are reviewing products, user reviews and citations are seen as valuable signals in deciding performance. Currently SelectScience does not currently offer Citations (See: [Biocompare](#))

Opportunity to partner with third party suppliers to enrich our product experience with citations.

See example CiteAb

Product Context

The Scientists' Channel®

Strategic Pillars

Each vertical has a role in creating the digital experience vision.

Audience First

Helping scientists find the best product designed to support the work they do. Focusing on what they value where they value.

Client Needs

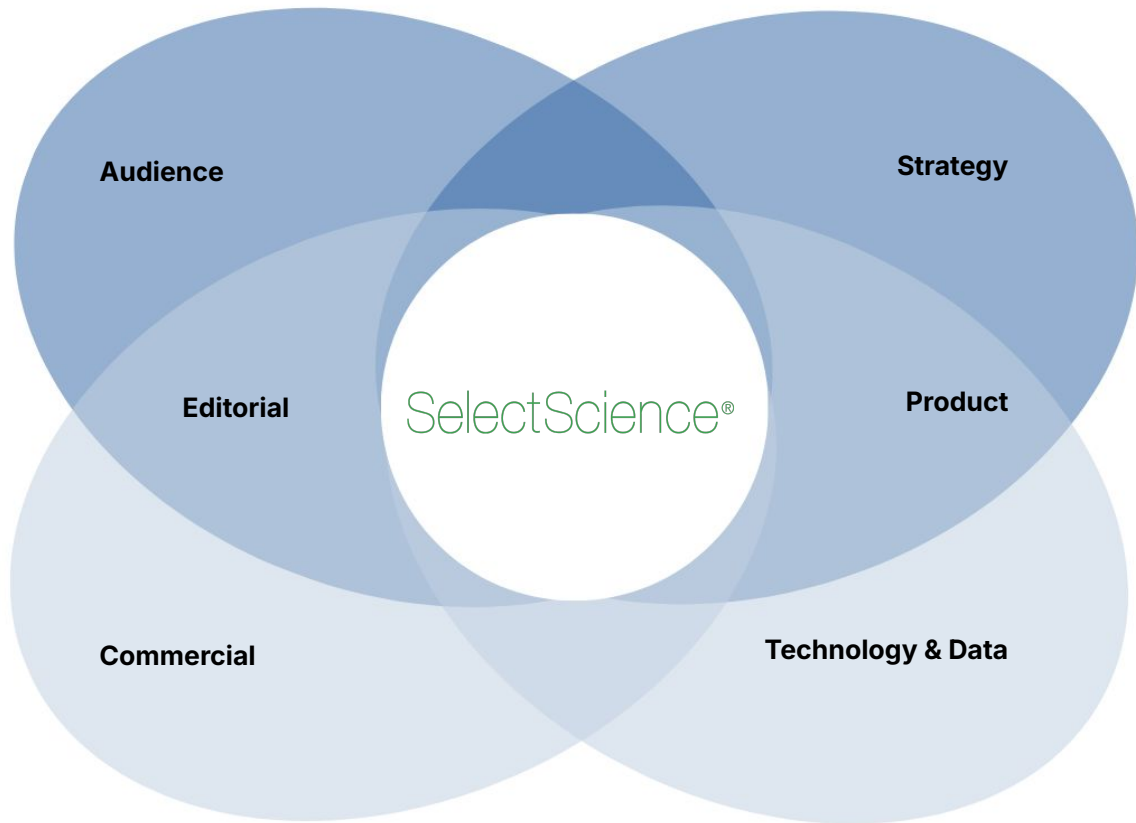

Support clients needs by giving access to audience and creating high quality leads.

Business Readiness

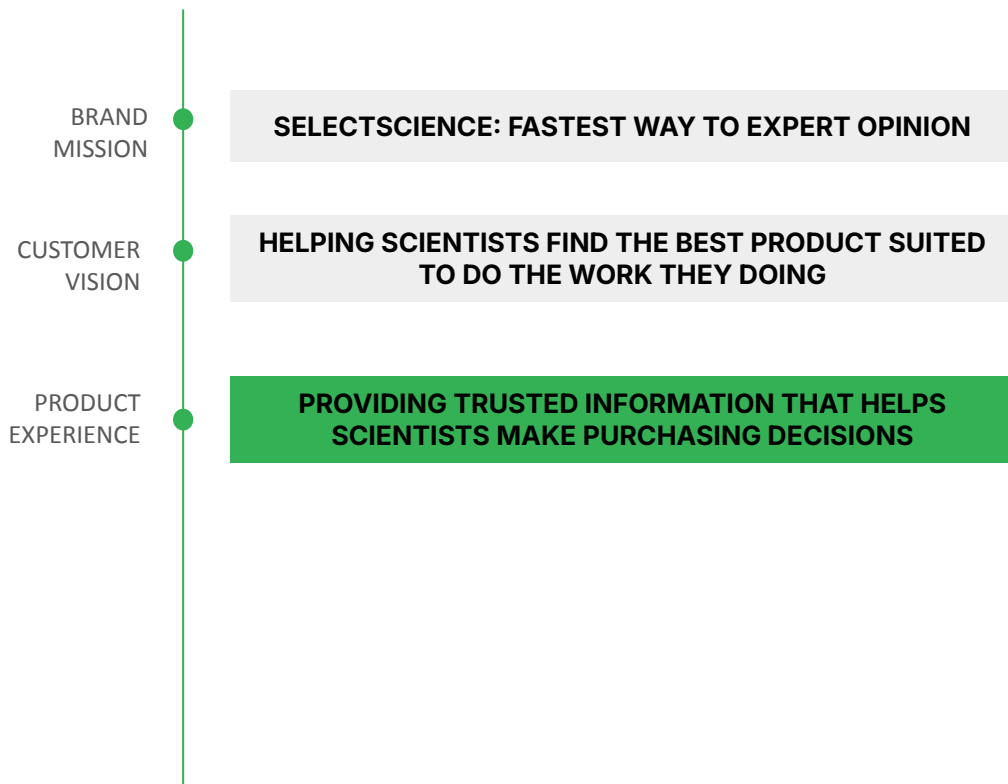

Ensure Select Science is setup to scale and grow. Protecting existing revenues while expanding into new opportunities

Product Experience Evolution

Improving the digital product experience to meet scientists where they are in the buying / purchasing lifecycle.

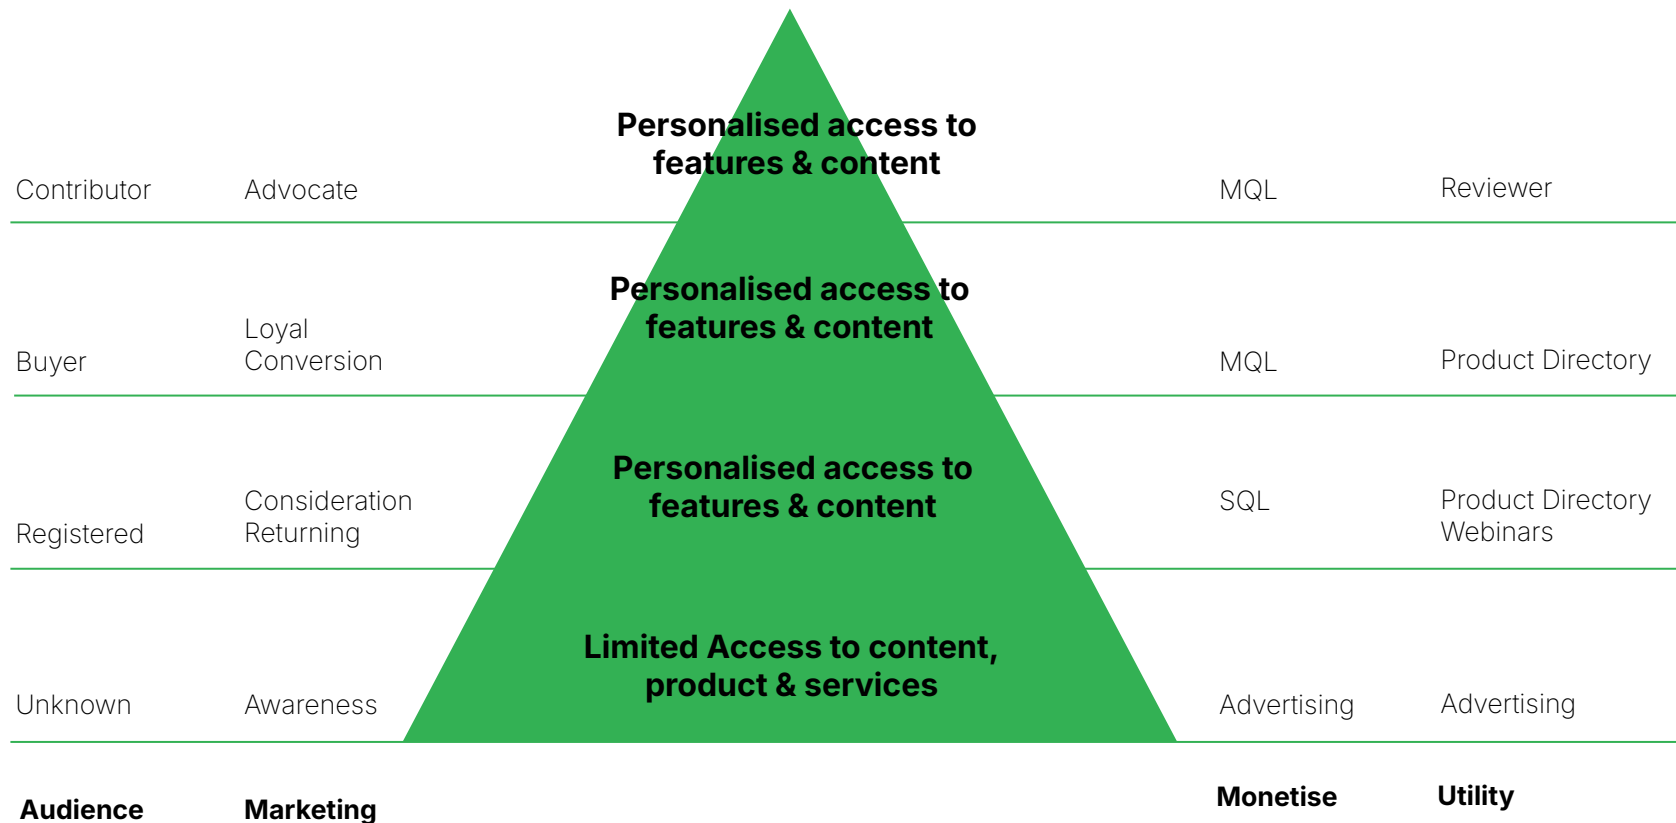

Vision

Influence of info sources across the buying journey

An editorial cycle that supports the needs of the client through their buying journeys and beyond, strengthening an ongoing relationship with Select Science

SelectScience®
The Fastest Way to Expert Opinion™

Content Automation

The Scientists' Channel®

Content Automation

BRIEF

Create a bulk enrichment tool across all existing content

- This would be a once off and / or bi-annual process
- Create an enriched content workflow tool for editors to add new classifications and recommendation to new content

EXPECTED BENEFITS

Within the existing workflow we need to explore the following

- Reducing manual effort in sourcing, enriching and classifying content that support audience (SEO goals)
- We have built an AI + SEO tool that allows editors to enhance content at individual URL level but this needs to be bulk conversion site or category wide.
- Design and application of knowledge graph

CURRENT CONTENT TYPES

SELECTSCIENCE Dedicated Content written and produced by Select Science editorial teams.

Product Descriptions, articles, ebooks, interviews, methods, application notes.

SUPPLIER CONTENT Supplier Content & Description, Factsheets. This information in some cases is directly ingested (not changed) from supplier website

USER REVIEW Written by reviewers - 3rd party / audience content

RELATED CONTENT Recirculation of site experience based on tagging and keywords.

CONTENT TYPES

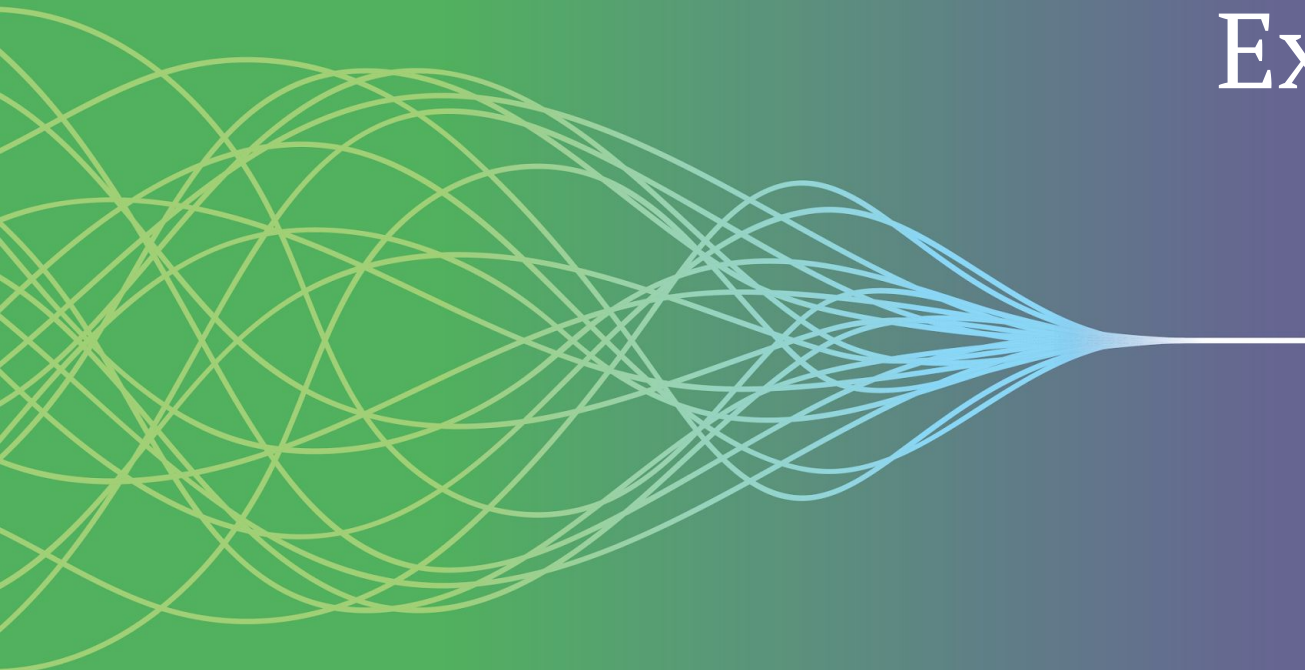

- Product Reviews = 38,147
- Events = 227
- Webinars = 1,178
- News & Articles = 49,618
 - News & articles= 27655
 - Application note downloads = 16624
 - Video = 5,305
 - How to Buy eBooks = 34

Digital Experience

The Scientists' Channel®

Digital Experience

BRIEF

Improve digital experience across the site with a focus on the product directory.

This will give scientists a reason to return to the site experience frequently to research products

Detailed information, analysis and recommendations based on their needs and behaviours

EXPECTED BENEFITS

- Registrations
- % Increase of SQL / MQL

NEW PROPOSED FEATURES

Improve digital experience across the site with a focus on the product directory.

- AI Summaries
- Enriched Product Reviews
- Enriched Citations

Example: AI Summaries & FAQs

AI Summary Beta

Researchers consistently praise this system for its **user-friendly workflow** and **reliable performance** in maintaining primary cell cultures. Many highlight the **animal component-free formulation** as a key advantage for reproducible research. Some reviewers noted the need for optimization when working with specific tumor types.

Used in 150+ peer-reviewed publications

This product has been cited in numerous scientific publications across cancer research fields.

AI Research Summary AI-Generated

Research using this culture system primarily focuses on **maintaining tumor heterogeneity** and **clonal diversity** in vitro. Leading studies demonstrate its effectiveness in **drug discovery pipelines**, **biomarker identification**, and **precision medicine applications**. The animal component-free formulation is particularly valued in **immunotherapy research** and studies requiring **reproducible culture conditions**. Recent publications highlight superior performance in **preserving rare malignant subpopulations** and **predicting clinical treatment responses**.
